## **END OF AUGUST 2021 CHBHC REPORT**

During the month of August, we did the following activities and home visits.

Number of homes visits 43

Number of activities

### **Week 1**

During this week we visited 07 clients and the story was of Dorothy who has now greatly improved in getting all her milestones and is now growing as a normal child. Dorothy has grown taller and can ably do everything on her own. Her understanding and speech greatly improved. Dorothy's mother was not home by the time of the visit had gone to the garden. At this stage Dorothy will benefit a lot from school education to introduce her into learning of other things in the world. We did learning activities like counting from 1 up to 1 and also did English speaking of how different things are called in English like table, chair and the rest.

### **Week 2**

This week we visited 11 clients and among the story was of Aheebwa Margret who had been ill for some weeks. Margret was found at home with a relative who was taking care of her. By our time of visit Margret was reported to be becoming better again. We gave her treatment, Mary

was however able to smile and talk with us. We encouraged the relative to give her doses as prescribed until they get finished and in case of any worsening signs despite being on treatment should tell us.

In the same week we enrolled Isaac a 4 weeks baby boy with hydrocephalus congenital problem born to mother who is HIV positive. Isaac condition had greatly worried his mother. His mother told us how she has 2 children, however her husband abandoned her when she was pregnant and up to now has never come back. This family is renting in Kasusu trading center. This single mother does casual labor to feed her family but at the moment is unable due to the child's condition. We are hoping to support this family in getting for them basic needs and most likely support them go to Mbarara for fluids removal procedure. This week we visited 10 clients and among the story was of Matrida who was not feeling well and we went with the clinical officer Keneth who took her blood pressure which was normal though was feeling other body pains which treatment was given to become better again.

#### Week 4

In this week we visited 15 client but the outstanding story was of food distribution to 8 clients. For the 3<sup>rd</sup> time again we received food support from our Good Samaritan who donated 15kgs of posho, 4 kgs of beans, 1 bar of soap to each client in supporting their nutrition in this tough times if covid 19. These clients received their packages and thanked her so much for being so generous to them.

#### Challenges

On and off illnesses affecting the progress of some our clients which hinders better growth.

## **AUGUST REPORT FOR CBHC AND YOUTH WHO RECEIVED MEDICAL SERVICES FROM YAWE MEDICAL CENTER.**

The month of August has not been good on the community based health care side as we lost one of our clients Kirungi Racheal though most of our members under CBHC and youth were in good health except for a few who had various minor medical conditions that have been successfully handled.

With deep sorrow we announce the death of one of our youth Kirungi Racheal, 24year old female from Busoma, who was a known ISS on TDF+3TC+ATV/Ritonavir who was earlier diagnosed with EXTRA-PYRAMIDAL S/E+BED SORES+SEVERE MALNUTRITION IN HIV/AIDS earlier on developed Advanced HIV Disease with respiratory distress Was referred to fort portal regional referral for further management and oxygen therapy and passed on after 4days of admission. She was buried on 24<sup>th</sup> August, 2021 and may her soul rest in peace (MHSRIP).

Back in one of our outreaches at Karambi during cervical screening one of those found with lesions on the cervix was referred to the regional referral for further investigations and management. She was found with cervical cancer which had spread to the uterus. She underwent surgery (total hysterectomy) and in our follow nursing procedures like drug administration and catheter removal, she reports great improvement and greatly thanks YAWE for being supportive to her since day one both medically and psychosocially.

Below is kobusinge Aisha, 52 year old who is now in great condition after her surgery with medical clinical officer Kenneth from YAWE during a follow up visit.

Most of our other CBHC clients and youths were in a good condition with minor infections especially common cold, upper respiratory tract infections, etc. which were successful treated.

16 personnel from our various care programs sought treatment and most being on continuous treatment for either Epilepsy, hypertension peptic ulcer disease, mental problems like depression or mania.

We thank God for the good health rendered unto both our staffs, CBHC clients, youths, PFK and everyone else.

## **VOCATION DEPARTMENT**

During the month of August, vocational training program moved on well in all two trades (tailoring, hairdressing) with enrolled of 11 trainees (6 tailoring, 5 hairdressing) as they look forward to end the course in August. As Yawe foundation we were entitled to train these trainees for 6month as we prepare them to qualify to do modular assessment given by Directorate of industrial training under MOES.

Beside training youth at our centre, we partner with other workshops in town to make sure that we give them skills that we are currently not offering at our centre, especially in welding, mechanics, carpentry and joinery.

As students look forward to end their course in during this month, we are collaborating with other training institutions that don't have assessment centre to bring trainees to do exams from our centre. In addition different tasks/tests to trainees have been ongoing to evaluate their competences and skills for the final exams.

Although the Government banned gathering and limited it was restricted to 20 people as one way of controlling the spread of Covid 19. We have tried to observe the SOPs by encouraging trainees to wear masks, wash hands, and keep social distance among others.

<b>Trade</b>	<b>Enrolment</b>		<b>Total</b>
	<b>Boys</b>	<b>Girls</b>	
Tailoring	00	06	06
Hairdressing	00	05	05

### **Good practices**

1. Resume of life skills every Friday student.
2. Evaluation exams/test successfully done.
3. We have engaged different partners to support students in trainings
4. Cooperation among teachers.
5. Students observing Covid SOPs is well maintained.

### **Challenges**

- Some trainees lack training materials.

### **Way forward**

- Encouraging the trainees to caregivers to provide training materials to the trainees.
- Encouraging trainee and teachers to come in time.

**Tailoring trainee displaying their materials after the test.**

**Social Enterprise Department**

Our building is now almost ready for use in all rooms however tiling of front rooms and the Verandah is still remaining we want to start using them this month. For example one room will be for YAWE Savings and credit Office, Tailoring Workshop for school Uniforms, Bakery products display room and one is still being used as our Workshop for Wileding.

We kindly appreciate the wonderful work of Pfk Members to enable our building reach this step.
